Bygone sash windows supply state-of-the-art Symphony windows featuring FINEO - vacuum insulating glass

THE BACKGROUND

When our Master Installer, Derwent Windows & Doors, were approached by a customer wanting to replace their aging wooden sash windows they also had some additional requests.

They not only wanted sash windows as close to the original wooden frames as possible, but they also wanted energy efficient windows and with the FINEO glass he not only got incredible U-values but excellent sound proofing compared to standard double glazing.

THE SOLUTION

After discussion with John Samuels, our Bygone Development Manager, Derwent had no hesitation in recommending Bygone Symphony sash windows featuring FINEO vacuum insulating glass, with a U-value of 1.2.

The ground-breaking addition of FINEO to Symphony sash windows lends what are some amazing performance improvements, to an already outstanding product.

SASH WINDOWS FOR MODERN HOMES

With the cost of living crisis affecting all households, and the importance of conserving energy and being more efficient, homeowners are looking at ways to future proof their homes. One way is with new energy saving technologies, but not at the expense of the period aesthetics of these buildings.

Bygone Symphony sash windows featuring FINEO glass was the perfect solution for this particular project, with all the features of traditional timber sash windows. These features include slim slight-lines; run-through horns; wood grain foil, replicating the texture of timber; patented Timberweld® technology, creating a butt-jointed appearance that looks every part their timber counterparts; and FINEO with the appearance of single glazing, but with all the advantages of modern glass technology.

BYGONE SYMPHONY FEATURING FINEO

Symphony is already widely acknowledged as the most authentic timber alternative sash window on the market. Symphony's unique and beautiful features enhance the product in such a way that many who see it up close believe it is constructed using hardwood timber.

With the addition of FINEO's advanced technology, this amazing product has now taken a giant leap forward, replicating the single glazed appearance of a traditional timber sash window.

FINEO glass is much more than glass technology, it's pure living comfort. This groundbreaking vacuum insulating glass not only delivers amazing energy performance, it also combines exceptionally high thermal insulation with impressive soundproofing, and unseen durability.

FINEO glass insulates to a level, previously only possible with triple glazing, but is lighter and thinner, letting in more natural light.

“The windows are absolutely amazing, we're already feeling the benefits of warmth in our home.”

VACUUM INSULATING GLASS

Why is it special?	What does that mean for you?
Slim, sleek and aesthetically pleasing	Slimline appearance similar to single glazing No unsightly vacuum evacuation point
Outstanding thermal performance	An amazing overall window value of 1.2U
State of the art materials and production techniques	Unprecedented 15 year guarantee
More natural light	At least 15% more daylight coming into your home, when compared with triple glazing
Harnessing more solar energy	Lower energy consumption helps lower emissions
Outstanding acoustic performance	An audible reduction in traffic and ambient noise
